Also, where are you keeping your versions of the comm. Materials? I want to make sure we are working off the same files!

Corrected, with the exception of the Fact Sheet. I do not have the Word version. Tony, can you help me out?

**Subject:** Frequent spelling error in Subpart W title

Hi,  
I have been reviewing the different pieces of the Subpart W package and I have identified an inconsistent spelling in the title of Subpart W across the different documents (including the fact sheet where it is used inconsistently) in the rule package, specifically the phrase "National Emission(s) Standard(s)". Depending on the document there may be Emission or Emissions. I looked it up and it should be "Emission". Likewise "Standard(s)" is inconsistently spelled. It should be "Standards".

So, it is National Emission Standards.

The phrase appears to be spelled correctly in the preamble though I have not done a full scan of the document.

FYI, I have minor comments on most of the documents in the Subpart W package.
